
About Us:

Lloyd Industries has been an active manufacturer of fire dampers and H.V.A.C. products for over 35 years.

Since the development of modern fire damper protection equipment, Lloyd Industries Inc. has provided Underwriters Laboratory approved fire dampers as well as other essential products for the H.V.A.C. industry. Our 35 years of manufacturing and supplying H.V.A.C. products, has punctuated Lloyd Industries' ability to provide customer satisfaction in quality, delivery and price.

As in the past, Lloyd Industries Inc. continues to develop new products and services to better serve the needs of our customers.

Access Doors

We manufacture both non-fire rated doors, as well as a 1.5 hour fire rated hinged access door. The non-fire rated doors come hinged or double cammed, galvanized or stainless steel and can be made square, rectangular or round. Dragon teeth come standard but pressure-sensitive foam tape backing is also an option.

Fire Dampers

Dynamic

Static

Combination Fire Smoke Dampers are used to prevent the passage of both flame and smoke. These motorized dampers are available in 3 classes; ultra-low leakage (class 1), low leakage (class 2), and leakage (class 3).
